

Case Study

Valve Manufacturers

About the customer

- A twenty years old company having turnover of around Rs 60 Corers, spreading across India. They are into Valves manufacturing, trading and Exporting business.
- This company produce different sizes and kinds of Valves like Gate valve, Round valves and swing check valves., right from conceptualizing, designing and manufacturing the hi-end tool products.

Solution

- Microsoft Dynamics AX-2009

Modules Implemented

They have chosen to implement MS Dynamics AX-2009 for their internal operations to streamline their business process. The following modules were implemented.

- General Ledger
- Accounts Payable
- Accounts Receivable
- Bank
- Inventory Management
- Production
- CRM
- Quality Assurance

Highlights

- Developed a new module(Quality) in AX-4.0 based on the client requirement with different scenarios and later the same customization used for the projects like Hawa Valves, R.L Steels.
- Developed a new functionality in Ax-5.0 “Assembly Master” with “Packing Box details” which will update from Production/Quality module.
- Developed a new functionality in Ax-5.0 “Product Item Code Master” which is of 40 field selection. Based on the selection Item codification will be generated.
